Education

Vellore Institute of Technology (VIT), Chennai

Chennai, India

Bachelor of Technology in Computer Science and Engineering; CGPA: 8.52/10

2021 – 2025

Technical Skills

Languages: Java, C++, TypeScript, SQL, Python

Backend: Spring Boot, REST APIs, Resilience4j

Frontend: Angular 16+, ReactJS, RxJS, HTML5, CSS3

Databases: MySQL, PostgreSQL, Redis, Liquibase

Frameworks & Tools: Docker, CI/CD, Kafka, Maven, Git, JUnit, Postman

Concepts: Microservices, System Design, JWT, Zipkin, Agile/Scrum, Data Structures & Algorithms

Experience

Software Engineer, Full-Stack

Jun 2025 – Present

LTIMindtree Limited

Pune, India

- Migrated 8+ production microservices from **Java 8 to Java 21**, improving performance and maintainability
- Built a rule-based eligibility engine serving **50,000+ users**, reducing latency and letting rules be updated without redeploying code
- Integrated **10+ SOAP/REST APIs** across distributed systems, reducing failures and improving reliability
- Built a **maker-checker** approval workflow requiring a second reviewer before duplicate customer records could be deleted
- Delivered features in an **Agile/Scrum** environment through sprint planning, standups, and peer code reviews

Projects

Spring Boot Microservices Architecture

- Designed a **4-service microservices** architecture with Spring Cloud, Eureka, and an API Gateway for scalable service decomposition
- Integrated **Resilience4j** circuit breakers and Zipkin tracing to prevent cascading failures and speed up debugging
- Containerized services with **Docker** and deployed on **Kubernetes** for scalable, reliable execution

API Rate Limiter

Live

- Built a scalable rate-limiting service using **Spring AOP** to protect backend systems from abuse and traffic spikes
- Implemented **3 swappable algorithms** (Token Bucket, Sliding Window, Fixed Window) via the Strategy pattern, needing zero controller changes to switch
- Validated quota correctness by stress-testing under **500+ concurrent requests** with Redis-backed shared state

TrainerHub

Live

- Built a full-stack platform for companies to assign trainers, schedule programs, and collect feedback across **3 user roles**
- Enforced **RBAC** at both the Angular route-guard and Spring Security method level, eliminating unauthorized access
- Replaced client-side filtering with **server-side pagination**, reducing page load time by **40%** on large datasets

Coursework

Technical Courses: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems, Computer Networks

Certifications: Generative AI for Java and Spring Development (IBM), Oracle OCI 2025 Generative AI Professional, Apache Kafka for Beginners (Udemy), Database Versioning with Liquibase and Spring Boot (Udemy), Advanced C++

Achievements: Solved 500+ problems on LeetCode and other coding platforms; successfully coordinated 2 events at the college tech fest
